DEPARTMENT OF STANDARDS MALAYSIA

DEVELOPMENT OF MALAYSIAN STANDARDS

The Department of Standards Malaysia (Standards Malaysia) is the national standards and

accreditation body of Malaysia.

The main function of Standards Malaysia is to foster and promote standards, standardisation and

accreditation as a means of advancing the national economy, promoting industrial efficiency and

development, benefiting the health and safety of the public, protecting consumers, facilitating domestic

and international trade and furthering international cooperation in relation to standards and

standardisation. The use of Malaysian Standards is voluntary except in so far as they are made

mandatory by regulatory authorities by means of regulations, local by-laws or any other similar ways.

Malaysian Standards (MS) are developed through consensus by committees which comprise balanced

representation of producers, users, consumers and others with relevant interests, as may be

appropriate to the subject at hand. The development of a standard as a Malaysian Standard is governed

by the Standards of Malaysia Act 1996 [Act 549]. Section 18A of the act stipulated that, all Malaysian

Standards are owned by the Government of Malaysia and no part of a Malaysian Standard can be

reproduced in any form without the written permission of the Director General.

MS 2723:2022

Foreword

This Malaysian Standard was developed by the Working Group on Testing Methodology for Biodiesel for Automotive Sector (NSC L/TC 7/WG 4) which reports to the Technical Committee on Vehicle Power Train and Fuel Systems (NSC L/TC 7) under the authority of the National Standards Committee on Transport (NSC L).

Compliance with this standard does not by itself grant immunity from legal obligations.
