DEVELOPMENT OF MALAYSIAN STANDARDS

The **Department of Standards Malaysia (STANDARDS MALAYSIA)** is the national standards and accreditation body of Malaysia.

The main function of STANDARDS MALAYSIA is to foster and promote standards, standardisation and accreditation as a means of advancing the national economy, promoting industrial efficiency and development, benefiting the health and safety of the public, protecting the consumers, facilitating domestic and international trade and furthering international cooperation in relation to standards and standardisation.

Malaysian Standards (MS) are developed through consensus by committees which comprise balanced representation of producers, users, consumers and others with relevant interests, as may be appropriate to the subject at hand. To the greatest extent possible, Malaysian Standards are aligned to or are adoption of international standards. Approval of a standard as a Malaysian Standard is governed by the Standards of Malaysia Act 1996 [Act 549]. Malaysian Standards are reviewed periodically. The use of Malaysian Standards is voluntary except in so far as they are made mandatory by regulatory authorities by means of regulations, local by-laws or any other similar ways.

STANDARDS MALAYSIA has appointed **SIRIM Berhad** as the agent to develop, distribute and sell the Malaysian Standards.

FOREWORD

This Malaysian Standard was developed by the Technical Committee on Beverages and Beverage Products under the authority of the Industry Standards Committee on Food and Food Products.

This Malaysian Standard is the first revision of MS 777, Specification for instant coffee.

Major modifications in this revision are as follows:

- a) clause 4 (Hygiene), 5 (Packaging and labeling), 7 (Quality of reagent), 8 (Legal requirements) and 9 (Certification marks) have been amended according to the Malaysian Standard guidelines;
- b) the method of sensory evaluation (Annex A) has been modified to be in line with the current practices in industries;
- c) the temperature in Annex B has been changed from 70 °C to 95 °C <u>+</u> 2 °C to comply with the method used; and
- d) the method for determination of caffeine has been changed to be in line with current requirements.

This Malaysian Standard cancels and replaces MS 777:1982.

Compliance with a Malaysian Standard does not of itself confer immunity from legal obligations.
