DEPARTMENT OF STANDARDS MALAYSIA

DEVELOPMENT OF MALAYSIAN STANDARDS

The Department of Standards Malaysia (Standards Malaysia) is the national standards

and accreditation body of Malaysia.

The main function of Standards Malaysia is to foster and promote standards, standardisation

and accreditation as a means of advancing the national economy, promoting industrial

efficiency and development, benefiting the health and safety of the public, protecting the

consumers, facilitating domestic and international trade and furthering international

cooperation in relation to standards and standardisation.

Malaysian Standards (MS) are developed through consensus by committees which comprise

balanced representation of producers, users, consumers and others with relevant interests, as

may be appropriate to the subject at hand. To the greatest extent possible, Malaysian

Standards are aligned to or are adoption of international standards. Approval of a standard as

a Malaysian Standard is governed by the Standards of Malaysia Act 1996 [Act 549]. Malaysian

Standards are reviewed periodically. The use of Malaysian Standards is voluntary except in so

far as they are made mandatory by regulatory authorities by means of regulations, local by-

laws or any other similar ways.

Committee representation

The National Standards Committee on Building, Construction and Civil Engineering (NSC D) under whose authority this Malaysian Standard was developed, comprises representatives from the following organisations:

Association of Consulting Engineers Malaysia Construction Industry Development Board Malaysia Department of Irrigation and Drainage Malaysia Department of Standards Malaysia (Secretariat) Federation of Malaysian Manufacturers Jabatan Bomba dan Penyelamat Malaysia Jabatan Kerajaan Tempatan Jabatan Kerja Raya Malaysian Iron and Steel Industry Federation Malaysian Timber Industry Board Master Builders Association Malaysia Pertubuhan Akitek Malaysia Pertubuhan Perancang Malaysia Projek Lebuhraya Usahasama Berhad Real Estate and Housing Developers' Association Malaysia Suruhanjaya Perkhidmatan Air Negara The Cement and Concrete Association of Malaysia The Institution of Engineers, Malaysia Universiti Putra Malaysia Universiti Sains Malaysia Universiti Teknologi Malaysia

The Technical Committee on Steel Products (TC/D/4) which supervised this Malaysian Standard consists of representatives from the following organisations:

Construction Industry Development Board Malaysia
Department of Occupational Safety and Health Malaysia
Department of Standards Malaysia (Secretariat)
Malaysian Iron and Steel Industry Federation
Malaysia Steel Association
Malaysian Structural Steel Association Master Builders Association Malaysia
SIRIM QAS International Sdn Bhd
The Institution of Engineers, Malaysia
Universiti Malaya
Universiti Teknologi Malaysia
Universiti Teknologi MARA

The Working Group on Tubular and Prefabricated Scaffolding (WG/D/4-3) which developed this Malaysian Standard consists of representatives from the following organisations:

Aerial Global Sdn Bhd
Construction Industry Development Board Malaysia
Construction Research Institute of Malaysia
Department of Occupational Safety and Health Malaysia
Department of Standards Malaysia (Secretariat)
Jabatan Kerja Raya Malaysia
Leform Sdn Bhd
SIRIM QAS International Sdn Bhd
Southern Pipe Industry (M) Sdn Bhd
SUMI-Tech Industrial Supplies Sdn Bhd
Universiti Teknologi MARA

MS 1462-1:2021

Foreword

This Malaysian Standard was developed by the Working Group on Tubular and Prefabricated Scaffolding under the authority of the Industry Standards Committee on Building, Construction and Civil Engineering.

With the substantial construction activities envisioned, the importance of the use of contemporary scaffolding cannot be ignored. Tubular and Prefabricated Scaffolding, currently being used widely in Malaysia, is one of the contemporary categories of scaffolding which can be assembled and dismantled speedily, transported and handled effortlessly.

This Malaysian Standard is the second revision of MS 1462-1, *Prefabricated scaffolds - Specification for steel frame scaffoldings.*

Major Modification in this revision are as follows:

- a) incorporation of members, "global bracing system", "side protection/guardrail" and "toe board" in Table 2;
- b) incorporation of new clause 10;
- c) replacement of Figure H1 with new figure and incorporation of clause H1;
- d) addition of annex P and incorporation of members "clamp" in Table 2;
- e) incorporation of members, "cross brace", "joint pin", "global bracing system", and "side protection/guardrail" in Table 2; and
- f) Revision of figure 3 and additional note.

This Malaysian Standard consists of the following parts, under the general title *Metal Scaffolding:*

- Part 1: Prefabricated scaffolds specification for steel frame scaffolding
- Part 2: Tubular (tube and coupler) scaffolds Section 1: Specification for steel tubes
- Part 2: Tubular (tube and coupler) scaffolds Section 2: Specification for aluminium tubes
- Part 2: Tubular (tube and coupler) scaffolds Section 3: Specification for steel and aluminium couplers, fitting and accessories
- Part 3: Prefabricated scaffolds Section 1: Specification for steel and aluminium modular system scaffolding
- Part 4: Temporary works equipment Section 1: Performance requirements and general design*
- Part 4: Temporary works equipment Section 2: Information of materials*

Foreword (continued)

Part 4: Temporary works equipment - Section 3: Load testing*

Part 5: Mobile access and working tower made of prefabricated elements – Materials, dimensions design loads, safety and performance requirements*

Part 6: Temporary installed suspended scaffolds and access equipment*

This Malaysian Standard cancels and replaces MS 1462:2012, *Metal scaffolding - Part 1: Prefabricated scaffolds - Specification for steel frame scaffolding (First revision).*

Compliance with a Malaysian Standard does not of itself confer immunity from legal obligations.

^{*}Under deliberation
