DEPARTMENT OF STANDARDS MALAYSIA

DEVELOPMENT OF MALAYSIAN STANDARDS

The **Department of Standards Malaysia (STANDARDS MALAYSIA)** is the national standards and accreditation body of Malaysia.

The main function of STANDARDS MALAYSIA is to foster and promote standards, standardisation and accreditation as a means of advancing the national economy, promoting industrial efficiency and development, benefiting the health and safety of the public, protecting the consumers, facilitating domestic and international trade and furthering international cooperation in relation to standards and standardisation.

Malaysian Standards (MS) are developed through consensus by committees which comprise balanced representation of producers, users, consumers and others with relevant interests, as may be appropriate to the subject at hand. To the greatest extent possible, Malaysian Standards are aligned to or are adoption of international standards. Approval of a standard as a Malaysian Standard is governed by the Standards of Malaysia Act 1996 [Act 549]. Malaysian Standards are reviewed periodically. The use of Malaysian Standards is voluntary except in so far as they are made mandatory by regulatory authorities by means of regulations, local by-laws or any other similar ways.

For the purposes of Malaysian Standards, the following definitions apply:

Revision: A process where existing Malaysian Standard is reviewed and updated which resulted in the publication of a new edition of the Malaysian Standard.

Confirmed MS: A Malaysian Standard that has been reviewed by the responsible committee and confirmed that its contents are current.

Amendment: A process where a provision(s) of existing Malaysian Standard is altered. The changes are indicated in an amendment page which is incorporated into the existing Malaysian Standard. Amendments can be of technical and/or editorial nature.

Technical corrigendum: A corrected reprint of the current edition which is issued to correct either a technical error or ambiguity in a Malaysian Standard inadvertently introduced either in drafting or in printing and which could lead to incorrect or unsafe application of the publication.

NOTE: Technical corrigenda are not to correct errors which can be assumed to have no consequences in the application of the MS, for example minor printing errors.

STANDARDS MALAYSIA has appointed **SIRIM Berhad** as the agent to develop, distribute and sell Malaysian Standards.

Committee representation

The Industry Standards Committee on Medical Devices and Facilities for Healthcare (ISC R) under whose authority this Malaysian Standard was developed, comprises representatives from the following organisations:

Association of Malaysia Medical Industries
Atomic Energy Licensing Board
Biomedical Engineering Association Malaysia
Department of Standards Malaysia
Federation of Malaysian Manufacturers
Institute for Medical Research
Malaysia Medical Device Association
Malaysian Association of Standards Users
Malaysian Medical Association
Malaysian Nuclear Agency
Malaysian Organisation of Pharmaceutical Industries
Malaysian Rubber Board
Malaysian Rubber Export Promotion Council
Ministry of Health Malaysia
Pharmaceutical Association of Malaysia
Radiation Physics, Biophysics and Medical Physics Sub-Group of Institute of Physics Malaysia
SIRIM Berhad (Secretariat)
SIRIM QAS International Sdn Bhd
Universiti Kebangsaan Malaysia
Universiti Teknologi Malaysia

The Technical Committee on Anaesthetic/Respiratory and Electromechanical Devices which developed this Malaysian Standard consists of representatives from the following organisations:

Academy of Medicine of Malaysia
Association of Private Hospitals of Malaysia
Biomedical Engineering Association Malaysia
Malaysia Medical Device Association
Malaysian Medical Association
Ministry of Health Malaysia
Ministry of Health Malaysia (Electrical Engineering Section)
Ministry of Health Malaysia (Mechanical Engineering Section)
Persatuan Jururawat Malaysia
SIRIM Berhad (Secretariat)
Universiti Malaya (Biomedical Engineering Department)
Universiti Teknologi Malaysia (Faculty of Electrical Engineering)

FOREWORD

This Malaysian Standard was developed by the Technical Committee on Anaesthetic/Respiratory and Electromechanical Devices under the authority of the Industry Standards Committee on Medical Devices and Facilities for Healthcare.

This Malaysian Standard is technically identical with ISO/TR 11548-2:2001, *Communication aids for blind persons - Identifiers, names and assignment to coded character sets for 8-dot Braille characters - Part 2: Latin alphabet based character sets*, published by the International Organization for Standardization (ISO).

MS 2369 consists of the following parts, under the general title *Communication aids for blind persons - Identifiers, names and assignment to coded character sets for 8-dot Braille characters*:

Part 1: General guidelines for Braille identifiers and shift marks

Part 2: Latin alphabet based character sets

This Malaysian Standard has been redrafted in order to provide a structure consistent with that of other Malaysian Standards.

Compliance with a Malaysian Standard does not of itself confer immunity from legal obligations.
