DEPARTMENT OF STANDARDS MALAYSIA

DEVELOPMENT OF MALAYSIAN STANDARDS

The **Department of Standards Malaysia (STANDARDS MALAYSIA)** is the national standards and accreditation body of Malaysia.

The main function of STANDARDS MALAYSIA is to foster and promote standards, standardisation and accreditation as a means of advancing the national economy, promoting industrial efficiency and development, benefiting the health and safety of the public, protecting the consumers, facilitating domestic and international trade and furthering international cooperation in relation to standards and standardisation.

Malaysian Standards (MS) are developed through consensus by committees which comprise balanced representation of producers, users, consumers and others with relevant interests, as may be appropriate to the subject at hand. To the greatest extent possible, Malaysian Standards are aligned to or are adoption of international standards. Approval of a standard as a Malaysian Standard is governed by the Standards of Malaysia Act 1996 [Act 549]. Malaysian Standards are reviewed periodically. The use of Malaysian Standards is voluntary except in so far as they are made mandatory by regulatory authorities by means of regulations, local by-laws or any other similar ways.

For the purposes of Malaysian Standards, the following definitions apply:

Revision: A process where existing Malaysian Standard is reviewed and updated which resulted in the publication of a new edition of the Malaysian Standard.

Confirmed MS: A Malaysian Standard that has been reviewed by the responsible committee and confirmed that its contents are current.

Amendment: A process where a provision(s) of existing Malaysian Standard is altered. The changes are indicated in an amendment page which is incorporated into the existing Malaysian Standard. Amendments can be of technical and/or editorial nature.

Technical corrigendum: A corrected reprint of the current edition which is issued to correct either a technical error or ambiguity in a Malaysian Standard inadvertently introduced either in drafting or in printing and which could lead to incorrect or unsafe application of the publication.

NOTE: Technical corrigenda are not to correct errors which can be assumed to have no consequences in the application of the MS, for example minor printing errors.

STANDARDS MALAYSIA has appointed **SIRIM Berhad** as the agent to develop, distribute and sell Malaysian Standards.

Committee representation

The Environmental Management Industry Standards Committee (ISC Z) under whose authority this Malaysian Standard was adopted, comprises representatives from the following organisations:

Association of Consulting Engineers Malaysia
Association of Environmental Consultants and Contractors Malaysia
Business Council for Sustainable Development Malaysia
Centre for Environment Technology and Development Malaysia
Environmental Management and Research Association of Malaysia
Federation of Malaysian Manufacturers
Jabatan Alam Sekitar
Jabatan Standard Malaysia
Malaysian International Chamber of Commerce and Industry
Malaysian Nuclear Agency
Malaysian Palm Oil Association
Malaysian Palm Oil Board
Malaysian Palm Oil Promotion Council
Malaysian Plastic Manufacturers Association
Malaysian Rubber Board
Malaysian Rubber Glove Manufacturers Association
Malaysian Textile Manufacturers Association
Ministry of Domestic Trade and Consumer Affairs
Ministry of Housing and Local Government
Ministry of International Trade and Industry
Ministry of Natural Resources and Environment
Ministry of Plantation Industries and Commodities
Ministry of Science, Technology and Innovation
National University of Malaysia
SIRIM Berhad
The Electrical and Electronics Association of Malaysia
The Institution of Engineers, Malaysia
Universiti Malaya
Universiti Putra Malaysia

The TC on Life Cycle Assessment which recommends adoption of the ISO Standard consists of representatives from the following organisations:

Business Council for Sustainable Development Malaysia
Centre for Environment Technology and Development Malaysia
Environmental Management and Research Association of Malaysia
Federation of Malaysian Manufacturers
Institute of Geology Malaysia
Jabatan Alam Sekitar
Malaysian International Chamber of Commerce and Industry
Malaysian Palm Oil Association
Malaysian Palm Oil Board
Malaysian Palm Oil Promotion Council
Malaysian Rubber Board
TNB Research Sdn Bhd
Universiti Malaya
Universiti Putra Malaysia

MS ISO 14044:2008

NATIONAL FOREWORD

The adoption of the ISO Standard as a Malaysian Standard was recommended by the TC on Life Cycle Assessment under the authority of the Environmental Management Industry Standards Committee.

This Malaysian Standard is identical with ISO 14044:2006, *Environmental management - Life cycle assessment - Requirements and guidelines*, published by the International Organization for Standardization (ISO). However, for the purposes of this Malaysian Standard, the following apply:

- a) in the source text, "this International Standard" should read "this Malaysian Standard"; and
- b) the comma which is used as a decimal sign (if any), to read as a point.

Compliance with a Malaysian Standard does not of itself confer immunity from legal obligations.

NOTE. IDT on the front cover indicates an identical standard i.e. a standard where the technical content, structure, wording (or is and identical translation) of a Malaysian Standard is exactly the same as in an International Standard or is identical in technical content and structure although it may contain the minimal editorial changes specified in clause 4.2 of ISO/IEC Guide 21-1.

**Environmental management — Life cycle
assessment — Requirements and
guidelines**

*Management environnemental — Analyse du cycle de vie — Exigences
et lignes directrices*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 14044 was prepared by Technical Committee ISO/TC 207, *Environmental management*, Subcommittee SC 5, *Life cycle assessment*.

This first edition of ISO 14044, together with ISO 14040:2006, cancels and replaces ISO 14040:1997, ISO 14041:1998, ISO 14042:2000 and ISO 14043:2000, which have been technically revised.
