MALAYSIAN STANDARD

MS 650:2020

Relative density of solid pitch and bitumen (Displacement method) - Test method (Second revision)

ICS: 75.140

Descriptors: relative density, solid pitch, bitumen, displacement method

DEPARTMENT OF STANDARDS MALAYSIA

DEVELOPMENT OF MALAYSIAN STANDARDS

The **Department of Standards Malaysia (Standards Malaysia)** is the national standards and accreditation body of Malaysia.

The main function of Standards Malaysia is to foster and promote standards, standardisation and accreditation as a means of advancing the national economy, promoting industrial efficiency and development, benefiting the health and safety of the public, protecting the consumers, facilitating domestic and international trade and furthering international cooperation in relation to standards and standardisation.

Malaysian Standards (MS) are developed through consensus by committees which comprise balanced representation of producers, users, consumers and others with relevant interests, as may be appropriate to the subject at hand. To the greatest extent possible, Malaysian Standards are aligned to or are adoption of international standards. Approval of a standard as a Malaysian Standard is governed by the Standards of Malaysia Act 1996 [Act 549]. Malaysian Standards are reviewed periodically. The use of Malaysian Standards is voluntary except in so far as they are made mandatory by regulatory authorities by means of regulations, local by-laws or any other similar ways.

PETRONAS Dagangan Berhad
PROPEL Berhad
Public Works Department
SIRIM Berhad (Previous Secretariat)
Shell Malaysia Trading Sdn Bhd
Universiti Malaya
Universiti Sains Malaysia
Universiti Teknologi PETRONAS

Foreword

This Malaysian Standard was developed by the Working Group on Bitumen and Bituminous Products under the authority of the National Standards Committee on Petroleum and Gas.

This Malaysian Standard has been updated to the latest standard writing format.

This Malaysian Standard cancels and replaces MS 650:1995, *Method of test for relative density of solid pitch and bitumen - Displacement method (First revision).*

Compliance with a Malaysian Standard does not of itself confer immunity from legal obligations.
