

MALAYSIAN STANDARD

MS 1882:2005
(CONFIRMED:2013)

Piston type float operated valves - specification

ICS: 23.060.50

Descriptors: design, materials, dimensions, performance, float operated valve, copper alloy-body,
light duty, heavy duty

NOTE. This MS has been reviewed by the responsible committee and confirmed that its contents are
current

DEPARTMENT OF STANDARDS MALAYSIA

DEVELOPMENT OF MALAYSIAN STANDARDS

The **Department of Standards Malaysia (STANDARDS MALAYSIA)** is the national standards and accreditation body of Malaysia.

The main function of STANDARDS MALAYSIA is to foster and promote standards, standardisation and accreditation as a means of advancing the national economy, promoting industrial efficiency and development, benefiting the health and safety of the public, protecting the consumers, facilitating domestic and international trade and furthering international cooperation in relation to standards and standardisation.

Malaysian Standards (MS) are developed through consensus by committees which comprise balanced representation of producers, users, consumers and others with relevant interests, as may be appropriate to the subject at hand. To the greatest extent possible, Malaysian Standards are aligned to or are adoption of international standards. Approval of a standard as a Malaysian Standard is governed by the Standards of Malaysia Act 1996 [Act 549]. Malaysian Standards are reviewed periodically. The use of Malaysian Standards is voluntary except in so far as they are made mandatory by regulatory authorities by means of regulations, local by-laws or any other similar ways.

For the purposes of Malaysian Standards, the following definitions apply:

Revision: A process where existing Malaysian Standard is reviewed and updated which resulted in the publication of a new edition of the Malaysian Standard.

Confirmed MS: A Malaysian Standard that has been reviewed by the responsible committee and confirmed that its contents are current.

Amendment: A process where a provision(s) of existing Malaysian Standard is altered. The changes are indicated in an amendment page which is incorporated into the existing Malaysian Standard. Amendments can be of technical and/or editorial nature.

Technical corrigendum: A corrected reprint of the current edition which is issued to correct either a technical error or ambiguity in a Malaysian Standard inadvertently introduced either in drafting or in printing and which could lead to incorrect or unsafe application of the publication.

NOTE: Technical corrigenda are not to correct errors which can be assumed to have no consequences in the application of the MS, for example minor printing errors.

STANDARDS MALAYSIA has appointed **SIRIM Berhad** as the agent to develop, distribute and sell Malaysian Standards.

For further information on Malaysian Standards, please contact:

Committee representation

The Mechanical Engineering Industry Standards Committee (ISC F) under whose authority this Malaysian Standard was developed, comprises representatives from the following organisations:

Department of Occupational Safety and Health
Department of Standards Malaysia
Jabatan Kerja Raya (Cawangan Mekanikal)
Malaysian Industrial Development Authority
Malaysian Iron and Steel Industry Federation
Ministry of Defence
Ministry of International Trade and Industry
National Institute of Occupational Safety and Health
Petroleum Nasional Berhad
SIRIM QAS International Sdn Bhd (Mechanical Product Testing Section)
Suruhanjaya Tenaga
The Institution of Engineers, Malaysia
Universiti Kebangsaan Malaysia
Universiti Malaya
Universiti Teknologi Malaysia

The Technical Committee on Fluid Systems and Components which supervised the development of this Malaysian Standard consists of representatives from the following organisations:

DOE Industries Sdn Bhd
George Kent (M) Berhad
IKRAM QA Services Sdn Bhd
Imac Industries Sdn Bhd
Jabatan Kerja Raya (Cawangan Bekalan Air)
Kementerian Perdagangan Dalam Negeri dan Hal Ehwal Pengguna
Pakar Sains Sdn Bhd
SIRIM Berhad (Secretariat)
SIRIM QAS International Sdn Bhd (Mechanical Product Testing Section)
SIRIM QAS International Sdn Bhd (Product Certification Unit)
Syarikat Bekalan Air Selangor Sdn Bhd
Tai Mai Tap Industries Sdn Bhd
Universiti Malaya
Well-Built Alloy Industries Sdn Bhd

The Working Group on Stopvalves which developed this Malaysian Standard consists of representatives from the following organisations:

DOE Industries Sdn Bhd
DYKAS Industries Sdn Bhd
George Kent (M) Berhad
IKRAM QA Services Sdn Bhd
Jabatan Kerja Raya (Cawangan Bekalan Air)
SIRIM Berhad (Secretariat)
SIRIM QAS International Sdn Bhd (Mechanical Product Testing Section)
SIRIM QAS International Sdn Bhd (Product Certification Unit)
Tai Mai Tap Industries Sdn Bhd
Well-Built Alloy Industries Sdn Bhd

FOREWORD

This Malaysian Standard was developed by the Working Group on Stopvalve under the authority of the Mechanical Engineering Industry Standards Committee.

Compliance with a Malaysian Standard does not of itself confer immunity from legal obligations.
